

Training Course

Certified ISO 27001 Lead Auditor

The ISO 27001 Lead Auditor course provides you with the necessary knowledge to perform and audit or take charge in the auditing of an Information Security Management System (ISMS).

This five day intensive course provides students with the knowledge of the steps needed to perform an audit for the certification bodies, and facilitates the accreditation process.

The course is conceived specifically for those who wish to perform external or internal audits according to the criteria of the ISO 27001:2005 standard. The students equally acquire the essential knowledge to provide the necessary help to other individuals and organizations that desire to conform to the standard. The training is equally aligned with the Generally Accepted Audit Principles, the Practices of Internal Audit (Institute of Internal Auditors – IIA) as well as with the Practices of the International Federation of Accountants (IFAC).

Trainer: Martin Dion

CISM, CISSP, ISO:20'000 LEAD AUDITOR (ITIL)

Above Security's own CTO*, Mr. Dion has 15 years of experience in IT security. He is formally trained in ISO:27001, ISO:20000, ISO:9001, PCI-DSS, BS25999, Risk Management and IT Governance. He is now located in Switzerland to help European based banks and international organizations to improve their information risk management.

* CTO: Chief Technology Officer
